

## As an industry, we can help eliminate hunger in Australia

**Over 2 million Australians face food insecurity every year, half of them children. If the grain industry can provide 3000 tonnes of grain a year, we can help to create an Australia without hunger. Every little bit helps.**

GrainFlow/Cargill is partnering with Foodbank to source donated grain to manufacture key staple foods such as bread, pasta and breakfast cereal for distribution to over 2,500 charities and community groups across Australia, including many in rural and remote areas.

By collaborating with farmers, suppliers, manufacturers, retailers and transporters, Foodbank turns every \$1 donation received into \$7 worth of food to provide balanced, nutritious meals for people in need due to personal circumstances or as the result of natural disasters.

By donating your grain, you'll be making a real difference to many thousands of Australian families.

### DONATING GRAIN IS EASY...

Foodbank is set up as a grain buyer at all GrainFlow sites so you can donate grain in the same way as you transact commercially. Just split tickets in the normal way and donate some of your grain to Foodbank using the contract **FOOD**.

Foodbank will provide you with a tax deductible receipt.

Donations can be made **upon delivery** at a GrainFlow site, on-line at [www.grainflow.com.au](http://www.grainflow.com.au) or by calling AWB Grower Services Centre on **1800 4GRAIN (1800 447 246)**.

GrainFlow/Cargill will waive all storage and handling fees and charges incurred by Foodbank.
