

# WHEAT STANDARDS 2021 - 2022

THIS CHART IS INTENDED TO ACT AS A GUIDE ONLY

703.4 - Wheat Standards 2021-2022 - Iss2 - September 2021

### Sampling Guidelines

- 1) A minimum of 5 vertical probes must be taken from every bin-load tendered for delivery with at least 5 litres to be drawn.
- 2) The sample must be mixed prior to assessment.
- 3) A half litre sub-sample must then be taken for test weight, screenings, unmillable, defect and contaminant determination.
- 4) A separate sub-sample may be taken for assessment of other traits.

### Binning guidelines.

Varietal restrictions apply to the grades on this chart.

**These standards are to be applied on individual truck loads and must not be averaged over a number of loads  
Segregations indicated on this chart are not available at all GrainFlow locations.**
