WHEAT STANDARDS 2023 - 2024

THIS CHART IS INTENDED TO ACT AS A GUIDE ONLY

703.4 - Wheat Standards 2023-2024 - Iss1 - September 2023

Sampling Guidelines

- 1) A minimum of 5 vertical probes must be taken from every bin-load tendered for delivery with at least 5 litres to be drawn.
- 2) The sample must be mixed prior to assessment.
- 3) A half litre sub-sample must then be taken for test weight, screenings, unmillable, defect and contaminant determination.
- 4) A separate sub-sample may be taken for assessment of other traits.

Binning guidelines.

Varietal restrictions apply to the grades on this chart.

These standards are to be applied on individual truck loads and must not be averaged over a number of loads Segregations indicated on this chart are not available at all GrainFlow locations.
